ENJOY ADVANCED ENGINEERING

The Enjoy range brings design and performance to luxury seating. Sharing many of the features of our top-range Ergohuman models, the Enjoy office chair provides intensive comfort.

With unique integrated lumbar support and a range of adjustments available by using the ingeniously simple single lever control to provide personalised comfort, the Enjoy chair is designed for the needs of individuals and organisations.

Enjoy's incredible value, organic curves, versatile frame and complete adjustability makes it one of the most desirable office chairs on the market.

Certified to EU standard EN 5459, Enjoy is ideal for those who are in an office chair for long periods of time and require intensive use seating. With highly engineered aesthetics, form and function, this ergonomic chair utilises a twin-pivot, synchro-tilt or automatic movement mechanism and offers ultimate adjustability for all users.

ENJOY ELITE

OVERVIEW:

The innovative design of this ergonomic chair incorporates our in-house-designed twin pivot mechanism for enhanced comfort. This delivers outstanding movement and constant support with minimal pressure on the underside of the thighs (first pivot point is located behind the user's knees and the second point under the ischial tuberosity).

With Dual Spring Technology for a smoother action; tilt mechanism with 4 position lock; seat slide and pneumatic height adjustment; height, depth, width and angle adjustable arms and optional 2D headrest, the adjustability of Enjoy Elite makes for a high performance, ergonomic chair.

The Enjoy chair is 97% recyclable, has Greenguard Gold Certification, is EN 5459-2:2008 certified and meets EN 1335-2:2009 and EN 1335-3:2009. Available in a choice of mesh, fabric or leather with a black frame and polished aluminium base.

FEATURES:

ALUMINIUM DETAILING

EXTENDED SINGLE LEVER CONTROL

TWIN PIVOT CONTROL MECHANISM

DUAL SPRING TECHNOLOGY

SEAT SLIDE

ENHANCED WATERFALL FRONT SEAT

SEAT PRESSURE REDUCTION INSETS

INTEGRATED LUMBAR SUPPORT

LOCKING HEIGHT, ANGLE, WIDTH & DEPTH ARMREST ADJUSTMENTS

OPTIONAL HEADREST WITH HEIGHT AND ANGLE ADJUSTMENT

ALL PARTS OF THE CHAIR ARE REPLACEABLE AND KEPT IN STOCK FOR LONGER LIFE-CYCLE

Build your own unique Enjoy Elite chair using a combination of mesh, fabric and leather finishes at comfort.global/create

ENJOYCLASSIC

OVERVIEW:

The Enjoy Classic features the same smart lumbar technology featured in the Elite model offering exceptional ergonomic support. Simple-to-use synchro mechanism on a 2:1 ratio allows the user to intuitively adjust the chair with a pictorial tension control on the right hand side.

An intuitive single lever control operates the three most frequently used chair functions – seat height, seat depth and back tilt can all be operated from a single point of contact. 3D multi-functional arms with soft-touch pads are also removable without affecting the chair's design.

The Enjoy Classic also boasts 95% recyclability, has Greenguard Gold Certification and meets EN 1335-2:2009 and EN 1335-3:2009. Available in a choice of mesh, fabric or leather with polished aluminium frame and base.

FEATURES:

PROJECTENJOY

OVERVIEW:

The beauty of Project Enjoy lies in its simplicity. Designed to be one of the most intuitive chairs on the market, it delivers superb ergonomic value and flexibility. Suitable for all users, Project Enjoy is the perfect solution for large organisations and agile working environments.

The single lever provides full control of the chair's features in four simple movements. This allows fast set-up with auto-adjustment to adapt to the weight of any user. The weight-balance mechanism auto-calibrates the recline resistance to suit each user when in dynamic mode.

With this intuitive single level control, automatic weight balance mechanism, integrated lumbar support and breathable mesh, the Project Enjoy delivers a stylish and affordable specification chair without compromising on design or functionality.

FEATURES:

FULLY AUTOMATIC WEIGHT BALANCE MECHANISM

TENSION MECHANISM

SINGLE LEVER TECHNOLOGY ACTIVATING HEIGHT, SEAT DEPTH & BACK LOCK ADJUSTMENT

INTEGRATED LUMBAR SUPPORT

SEAT SLIDE

ENHANCED WATERFALL FRONT SEAT

SEAT PRESSURE REDUCTION INSETS

LOCKING MULTI-FUNCTIONAL ARMS WITH SOFT-TOUCH PADS -REMOVABLE WITHOUT AFFECTING CHAIR STYLING

OPTIONAL 2D HEADREST WITH ANGLE & HEIGHT ADJUSTMENT

12 ENJOYELITE SEATING INNOVATION FEATURES

For a full technical specification, please see page 21-22.

OPTIONAL HEADREST

The headrest can be tilted and height-adjusted to suit the user's individual requirements.

BACK HEIGHT

Raise or lower the chair's backrest to support the user's back and lumbar region.

LUMBAR SUPPORT

The Enjoy boasts an integrated lumbar system which, unlike traditional chairs, delivers constant lumbar support. This feature helps reduce musculoskeletal complications, enhancing workplace well-being.

SEAT HEIGHT

Raise or lower the chair's seat height to fit the individual user's anthropometric measurements.

SEAT SLIDE

This feature allows depth adjustment of the seat to accommodate the length of the user's legs.

POLISHED BASE

Polished aluminium five-star base with 60 mm PU castors.

TWIN-PIVOT MECHANISM

Comfort's patented dual pivot technology offers enhanced movement and constant support with minimal pressure on the underside of the thighs (first pivot point is located behind the user's knees and the second point under the ischial tuberosity). This encourages continuous supported body movement, therefore increasing blood circulation and reducing fatigue. An additional lock allows the user to recline in a range of positions.

Dual spring engineering helps the user to find the perfect resistance for their weight, and delivers a smooth and comfortable recline action.

TENSION CONTROL

Adjusts tension of the mechanism to support the user's weight when in dynamic mode.

ARMRESTS

Height (8 positions lock), width, angle and depth adjustable to allow forearms to rest comfortably whilst taking the weight off the user's shoulders.

ENHANCED WATERFALL FRONT / SEAT PRESSURE REDUCTION

The rounded front seat is designed to reduce pressure points on the underside of user's thighs. In addition, foam panels surround both front and sides of the seat for greater pressure distribution.

EXTENDED SINGLE LEVER MECHANISM

Ingeniously simple single lever control to operate the seat height, depth and back tilt functions.

ELITE

14 ENJOYPROJECT &CLASSIC SEATING INNOVATION FEATURES

For a full technical specification, please see page 21-22.

OPTIONAL HEADREST

The headrest can be tilted and height-adjusted to suit the user's individual requirements.

BACK HEIGHT

Raise or lower the chair's backrest to support the user's back and lumbar region.

LUMBAR SUPPORT

The Enjoy Classic and Project Enjoy boast a patented lumbar system which, unlike traditional chairs, delivers constant lumbar support.

This feature helps reduce musculoskeletal complications, increasing workplace well-being.

SEAT HEIGHT

Raise or lower the chair's seat height to fit the individual user's anthropometric measurements.

SEAT SLIDE

This feature allows depth adjustment of the seat to accommodate the length of the user's legs.

MULTI-FUNCTIONAL MECHANISM (Classic)

Single lever control allows back to recline to a 2:1 back-to-seat ratio for personalised comfort and support.

TENSION CONTROL

Adjusts back tension to allow the back to tilt comfortably supporting the user's body weight when reclining.

FIVE-STAR BASE

Enjoy Classic feature a polished five-star base with 60 mm castors as standard.

Project Enjoy features a black nylon base as standard but can be upgraded to the aluminium base on request.

AUTOMATIC TENSION WEIGHT BALANCE MECHANISM

When recline, the mechanism can adjust automatically the back-tilt tension according to each user's body weight to provide suitable tension. Each user does not need to adjust the tension by manual.

SEAT SLIDE

This feature allows depth adjustment of the seat to accommodate the length of the user's legs.

ARMRESTS (Project)

Height (6 position lock), angle and depth adjustable to allow forearms to rest comfortably. These arms are removable without affecting the design of chair.

ENHANCED WATERFALL FRONT / SEAT PRESSURE REDUCTION

The rounded front seat is designed to reduce pressure points on the underside of user's thighs. In addition, foam panels surround both front and sides of the seat for greater pressure distribution.

PROJECT

ARMRESTS (Classic)

Height (6 positions lock), angle and depth adjustable to allow forearms to rest comfortably whilst taking the weight off your shoulders. Removable without affecting the design of chair.

WATERFALL FRONT SEAT

The rounded front seat is designed to reduce pressure points on the underside of user's thighs.

SINGLE LEVER CONTROL MECHANISM

Ingeniously simple single lever control to operate the seat height, depth and back tilt functions.

18 ENJOY UPHOLSTERY

Comfort are passionate about using mesh on our chairs due to their durability and ergonomic properties. In addition, we have selected a range of complementary leathers and fabrics to mix-and-match. Should you wish to upholster in an alternative material, we work with all the leading contract fabric suppliers and can advise of suitability – non stock items will increase lead times.
